Thant Htoo San - Frontend Development

Summary

The PRD defines the core screens and responsive range well, but frontend implementation still needs clear navigation, public-access rules, UI state specifications, accessibility criteria, validation ownership, timezone display, and client/server synchronization behavior.

All Findings

ID	PRD section	Issue or question	Why it matters	Severity	Recommended change
FE-01	UI/11.2	Navigation and route map undefined	Inconsistent user journeys	High	Define routes and protected-route rules
FE-02	Roles/3	Public visitor behavior unclear	Wrong access or hidden content	High	Allow public browse/details; require login to register
FE-03	UI/11.2	Screen states named but not specified	Uneven loading/error UX	High	Create state matrix and reusable components
FE-04	NFR/6	No accessibility acceptance criteria	Users may be excluded	High	Target WCAG 2.1 AA basics
FE-05	API/11	Request/response schemas pending	Frontend integration may block	Medium	Agree typed API contract before coding
FE-06	Security/12	Client/server validation split unclear	Conflicting or unsafe feedback	Medium	Validate for UX; trust server result
FE-07	Data/8	Campus timezone display unspecified	Students may see wrong times	Medium	Display Asia/Bangkok; store UTC
FE-08	Error/13	Retry and stale-state behavior unclear	Duplicate actions or false success	Medium	Disable pending actions; refetch authoritative state
FE-09	NFR/6	Browser/device test matrix absent	Responsive defects reach demo	Low	Test Chrome/Edge and 360/768/1440 px

Decision Requests For The Group

1. Navigation - Confirm public, Student, and Organizer routes plus route guards.
2. UI States - Approve shared loading, empty, validation, network-error, and permission-denied patterns.
3. Accessibility - Use keyboard navigation, visible focus, labels, semantic HTML, and sufficient contrast.
4. Timezone - Display all activity times in Asia/Bangkok while the backend stores UTC.
5. Server State - After register/cancel, disable duplicate clicks and refresh the authoritative registration state.
